DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on September 7, 2009 has been entered.

Allowable Subject Matter

2. Claims 31, 33, 34, 39, 42, 44, 45, 50-59, 61-62, and 65-75 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to sufficiently describe or suggest an apparatus comprising a first processing device, wherein the processing device generates and transmits a first signal to at least one of a fuel cell, a fuel cell temperature measuring device, fuel cell by-product measuring device, and a fuel cell output measuring device, wherein at least one of the devices is located at or is associated with a premises, wherein the first processing device is located at a location remote from the premises. The first processing device is responsive to a second signal from a second processing device located at a remote location, remote from the first processing device and the premises, and wherein the signal is transmitted over the Internet or the World Wide Web. The first signal is transmitted from the first processing device to a third processing device located at the premises and the third processing devices generates or transmits a third signal to at least one of a fuel cell, a fuel cell temperature measuring device, fuel cell by-product measuring device, and a fuel cell output

measuring device. The first processing device or third processing device determines whether an action or an operation associated with information contained in the first signal is an authorized or allowed operation and if the action or operation is authorized or allowed, the third processing device generates and transmits a third signal in response to the first signal. These along with further limitations set forth by the claims render the application allowable over the prior art of record.
